

Author Contributions Statement

Self-Adaptive Model-Based Protection for IBR-Penetrated Networks: A Unified Five-Layer Framework

Arun V. Eluvathingal

S. A. Soman

This statement describes the contribution of each author to the manuscript submitted to *Proceedings of the IEEE*.

Author	Contributions
Arun V. Eluvathingal	Conceived the five-layer SAMBPS architecture (C16); developed the theoretical contributions C1 (adaptive slope), C9 (SVD interlacing), and C13 (CUEP bound); designed and executed all seven validation campaigns (G1–G7); performed all simulations and hardware experiments; wrote the complete manuscript.
S. A. Soman	Supervised the research programme; provided critical guidance on protection engineering requirements and system-level framing; reviewed and revised the manuscript for intellectual content; co-approved the final submission.

Both authors have read and approved the final manuscript. No other persons made substantial contributions to the work described.

Funding. This research was supported by the Department of Electrical Engineering, Indian Institute of Technology Madras, through institutional research funding. No external funding bodies influenced the study design, data collection, analysis, interpretation, or the decision to submit for publication.

Conflicts of interest. The authors declare no conflicts of interest.

Data availability. The ANDES simulation models and MATLAB/Python code for the SAMBPS validation campaigns are available upon reasonable request to the corresponding author.
