

Author Contributions Statement

Wide-Area Consensus via GOOSE for Coordinated Protection in IBR-Rich Distribution Networks

Arun V. Eluvathingal

S. A. Soman

Author	Contributions
Arun V. Eluvathingal	Conceived and designed the quality-weighted GOOSE consensus protocol (C14); derived all theoretical results (Theorems 1–2, Proposition 1); implemented the protocol on SEL-411L relay hardware; conducted all simulation and hardware experiments; wrote the manuscript.
S. A. Soman	Supervised the research; provided guidance on IEC 61850 communication requirements and protection coordination engineering context; reviewed and approved the manuscript.

Both authors have read and approved the final manuscript.

Funding. Institutional research funding, Department of Electrical Engineering, Indian Institute of Technology Madras.

Conflicts of interest. None declared.
