

End A (local relay)

End B (remote relay)

Fibre carrier
2 ms delay

Protected line A-B

Trip time at A: $t_{\text{POTT}} = t_{67/87L} + t_{\text{carrier}} = 30 + 2 = 32 \text{ ms} \ll T_{\text{mem}} = 100 \text{ ms} \Rightarrow$ memory polarisation valid at trip
